Preparation of a new route

The « recce » team is ready to go to Africa to prepare the new route concocted by Stephane Peterhansel and Dominique Rochette which will bring you on new tracks far from touristic areas. More dunes this year with a innovating crossing of the dunes of Chebbi and Chegaga and Laayoune. A loop around Tan Tan where the playground is vast and varied.

Then the rally will cross Mauritania totally off-track to Atar crossing dunes or lunar landscapes and a lot of other surprises which we shall reveal you step by step.

The system of 2 levels of difficulties and the possibility of by-passing the big difficulties for non experienced pilots worked very well for the 2009 edition.

We keep the same system for the stages with several zones which participants can make at their pace according to their level or simply to their envy.
